Professional Experience

Front End Developer Intern

Jan 2023 – Present

Blaise Transit, Montreal, QC

- Utilize Asana to track and fix bugs across 2 web apps and 1 mobile app, consistently meeting or exceeding deadlines and producing high-quality work.
- Participated in Agile software development life cycle, including daily stand-up meetings and sprint retrospectives.
- Create and maintain reusable components such as forms, modals, and other UI elements to streamline development processes and ensure consistent design patterns.
- Collaborated with the team to hold design sessions, identify technical problems, and develop innovative solutions to improve overall product quality.

Full-Stack Developer

Feb 2021 - May 2021

Artisan Residential Services, Langley, BC

- Designed and developed a modern, user-friendly UI/UX to fit the client's new brand direction, resulting in a 20% increase in accessibility compared to the previous website.
- Created a dynamic and responsive website using React.js and Bootstrap that supported all device formats, resulting in improved user engagement and increased traffic.
- Improved content management by implementing a REST API using Strapi with MongoDB Atlas, resulting in a 70% decrease in content update times compared to the previous website.

Freelance Developer

Apr 2020 – Jun 2020

Artisan Hardwood Countertops, Langley, BC

- Redesigned an existing website with a responsive design using Webflow, resulting in a 50% increase in accessibility.
- Implemented a content management system using Webflow CMS to streamline content updates, resulting in a 70% increase in user productivity.

Projects

SunnySundayBot

May 2022

- A Discord Bot application that scrapes the Maplestory game website and sends announcements of upcoming in-game events.
- Parsed data using Python with BeautifulSoup and output the data to a Discord server with over 500 members using Discord.py.

gunnhwang.com

Feb 2022

- Created a professional portfolio website using Gatsby that showcases my projects and skills.
- Designed the website's UI/UX using Figma, ensuring a clean, modern, and user-friendly experience for visitors
